

**HEATHER CAMPISANO**

DEVELOPMENT REVIEW INTERN

CURRENT POSITION: DEPUTY DIRECTOR  
FOR DEVELOPMENT REVIEW

*I have been working in the same department within Economic Development for the past 7 1/2 years, and was promoted to Deputy Director for Development Review in 2006. I currently manage a staff of ten Project Managers and oversee the permitting process for all projects within the City of Boston.*

**NIGEL JACOB**

URBAN MECHANICS FELLOW

CURRENT POSITION:  
SENIOR ADVISOR FOR  
EMERGING TECHNOLOGIES

*The kind of experience I accrued during my time as a fellow couldn't be bought. I was given access to the highest levels of City government and was able to take part in the decision-making process quite often. I worked as an Urban Mechanics Fellow for a year, and I very much consider this time a crash-course MBA in public management.*

## BOSTON URBAN MECHANICS PROGRAM

## INTERNSHIPS

### Semester

Semester-long internships are available for graduate and undergraduate students in all majors. Boston Urban Mechanics Interns will work within various City departments. Semester interns will work closely with city government officials on special projects that assist with department operations. Internships can also count towards class credit, with prior approval from a professor.

### Summer

Summer internships with the Boston Urban Mechanics Program are 8 weeks, full time and available for graduate and undergraduate students. Interns receive a stipend and will work on special projects that assist with department operations. Summer internships provide a unique opportunity for interns to participate in development sessions and seminars featuring senior government officials.

## FELLOWSHIPS

Boston Urban Mechanics Fellowships are a limited number of highly selective, full-time positions with the City of Boston. Fellows will be assigned to city departments and participate in policy decisions and gain in-depth knowledge of the inner workings of city government. Fellows will also have the advantage of presenting their best ideas to the Mayor.

## FULL TIME EMPLOYMENT

If you are a recent graduate looking to make a difference and pursue a career that is both challenging and rewarding, take a look at the City of Boston Career Center:

[www.cityofboston.gov/ohr/careercenter](http://www.cityofboston.gov/ohr/careercenter)

## WHY WORK FOR THE CITY OF BOSTON?

**The Boston Urban Mechanics Program** is an introduction to the future that awaits you in government and public service. This experience is an invitation to explore not only our city government, but also the vast network of partnerships — among City agencies, businesses, institutions and non-profit organizations — that make our city work.

Interns and fellows with the Boston Urban Mechanics Program will have the chance to be “urban mechanics” with a hands-on approach to working with the city’s challenges and strengths. Interns and fellows will interact with their peers and City officials through seminars, special events and networking sessions.

Every intern and fellow will have a challenging and rewarding experience. Interns and fellows will take away skills that they can apply whether they pursue a career in public service or continue their service to their communities in other arenas.
